

# Frage zu Radio Mexico

**Post by "MOPF1" of Apr 19th 2022, 9:03 pm**

Hi Taha, sounds similar to my problem. Is you radio built in? The reason I'm asking, I heard it isn't a good idea to operate the radio other than connected to a car battery. I tried mine with a 20A power supply. It seems to have enough power but you never know. Next time I will give the car battery a try. If this fails, I will send it to [Rainer Königs](#). He is doing a good job, repairing and maintaining those radios.

Best

Rob
