220 SEB COUPE SCHIEBEDACH HIMMEL

Post by “Stebuga” of Jun 24th 2020, 10:47 am

Hello to all: I am completing the restoring of my 220 seb coupe and actually I am renewing the dachhimmel. The problem is that I found out that opening roof top has not the frame (schiebedach himmelrahmen). I have seen this frame is no more available, but maybe someone could suggest any hint (material, sizes), to do it by yourself?

Thank you in advance

Stefano

Hallo an alle: Ich beende die Restaurierung meines 220 seb Coupés und renovierung dachhimmel. Das Problem ist, dass ich herausgefunden habe, dass das schiebedach nicht den himmelrahmen hat.

Ich habe gesehen, dass dieser Rahmen nicht mehr verfügbar ist, aber vielleicht könnte jemand einen Hinweis (Material, Größen) vorschlagen, um es selbst zu tun?

Vielen Dank im Voraus

Stefano

Hi Stefano,

you are talking about the inner covering of the sliding roof?

Would be better to get yourself a used one instead of trying to reconstruct it. Because it is a frame of a certain quality of spring steel strips, to keep the covering under a certain tension.

Here´s an offer on Ebay: CLICK

A used covering will fit from all W110/111/112 models with manual sliding roof.

Good luck,

and regards,

Lutz

Stefano,

there is another colleague in Italy who could use some other parts from the offered sliding roof.

Maybe you could contact him and try to share the costs for buying and shipping?

Just as an idea..

Here is his thread: CLICK!

Good success,

and regards,

Lutz

The first link you sent me on kleinanzeigen, he told me parts are reserved till saturday :-/. I found another one that sells schiebedach complete of all but probably he doesnt know english or google translate: now I have written to him in deutsch. Let’ s see...

Unfortunately, on Ebay Kleinanzeigen, part was already sold, but I tried to write for a request to Mercedeslager, and he found a used frame that I have already received!

Problem solved, also thank to Lutz, because I remembered about Bruno Wenner while looking the thread linked above! 👍

Hi Stefano,

here ist the hole roof. Maybe better than nothing...

BG Ralf

Thank you Ralf, but I have luckily found at Mercedeslager.de the simple frame for a mere 29€ .
