

## **C123 Fuel Relay part number?**

**Post by “irozen77” of Sep 19th 2024, 1:24 pm**

Hello

I make full restoration for my 280CE (USA version), VIN: WDB12305312022758.

I replace the old Main Harness with new one that I bought from internet, it was 280E/CE/TE (euro Spec)

part Number : A1235405106.

Now when I make new connection to headlight and A/C and relay I see that its not exactly fits.

I make now the changes for connectors, but the socket of fuel relay, is much different .

I try to find what is the part number of the new fuel relay that I need.

I saw on internet that for 280CE euro spec the fuel relay is 0015456805, but this relay have more connectors from the new socket that I have.

anyone can help me with that from the photos?

Also wiring diagram of this new fuel relay ?

Thanks

Guy

Hallo Guy,

es gibt verschiedene Ausführungen für Benzinpumpenrelais. Das hängt vom Baujahr ab. Auf deinem Foto ist die neueste Version zu sehen.

Hello Rory,

Thanks for your links

I will read and learn about that
